

## **Atrial Flutter**

**Patient:** *Linda Chavez, 66*

### **Presentation**

Reports of sudden “racing heart.”

- HR: 150 bpm
- BP: Stable

### **Monitor**

Sawtooth flutter waves.

### **3D Electrical Model (Critical Here)**

Single re-entry circuit looping in the right atrium.

### **Cellular**

Continuous depolarization via re-entry pathway.

### **EMS Medication**

**Metoprolol and diltiazem**

### **Why It Works**

Blocks  $\beta_1$  receptors → decreases cAMP → reduces  $\text{Ca}^{2+}$  entry in AV node → slows ventricular response.
