

Supraventricular Tachycardia

Patient: *Ashley Ramirez, 22*

Presentation

Sudden onset palpitations while studying.

- HR: 210 bpm
- BP: 118/72

Monitor

Narrow complex tachycardia. P waves hidden.

Electrical Macro

Re-entry loop within AV node.

Cellular

Dual AV nodal pathways conduct rapidly.

EMS Treatment

Vagal maneuvers first.

Medication:

Adenosine first then diltiazem
(or per local protocol)

Slows AV nodal conduction → breaks reentry loop.
